

# Some Necessary Tasks

Available and Priority

Dr. Hashim Ibrahim 1/22/14 General

# Great Achievements

They are always attempts that really reach achievements, whether in a short or fast time, which may also be based on what

It has been achieved by achieving speed in completing what is intended for it to be done, and it may be in a long time, as it may also be one of the great achievements

It is difficult and even complicated because there have been developments that are integrated with what is being built from those projects or the achievements that are being achieved in

What location and what time. Of course, there must be a need for that, appropriate support, and doing what is required with the availability of all these elements

necessary for this, and according to standards and criteria taken into account, and the availability of the rest of the necessary and basic specifications according to priorities that are taken into account

With it, and of course, security and safety are placed at the top of the list, since without security and safety nothing can be achieved, and a lot of things happen

Damage, injury, and even error, omission, and forgetfulness, which are so dangerous as to lead to the occurrence of disaster,

and this is something that no one is satisfied with, and everyone

He envisages walking in safe ways and paths that lead to achieving goals and achievements in comfort, safety and peace.

One of the things that may affect our small or large tasks in the short or long term is the strength or weakness of the existing support.

To perform these tasks, and the strong positive impact they may have, so they receive more support, advocacy, development, modernization, or whatever may happen.

Negatives and disadvantages that may lead to damage and harm, and the dangers that may result that must be avoided and avoided publicly, and work to take

The necessary precautions and precautions that prevent the occurrence of any of the damages and dangers that occur, and what may be there that leads to

Its continuity due to what may be good and beneficial in what is being done, which may be in the long term, but by taking all these precautions

And the necessary measures in order to avoid what may disturb or lead to damages and dangers that may occur. These things are not new in life, but this

What may happen, and happens, and happened, and that there are variables that may be in space and time, and what leads to continuity and continuity,

Which may achieve the required needs and requirements, with the availability of appropriate methods and means of communication

Through interviews, close presence, or remote communication, as is happening in our modern civilized era, with the availability of all these easy possibilities.

And the facilitator that has become available, and performs the required purpose of everything that is necessary.

Effort must be made, even if there are difficulties and losses that may occur in any way, so all losses are rejected

There was nothing to compensate for it, and the corresponding profits and gains, and this is the usual and natural for everyone who faces these difficulties or complications

Existing, in any field or field. So, the reasons for this must be identified first, and then those methods

The usual, traditional, modern and smart means and overcoming the paths and elements that compensate for going through the same path that

He reaches to achieve what he wants to be achieved in his usual framework. There may be a better choice of place and time, and take all those precautions

The necessary means of security and safety, and what there may be of strong support that leads to work on steadfastness in performing the tasks for which it is intended, which

We may find it often in basic human needs, cooperation and rapprochement, or renewal and distance, as these are all elements according to what

There may be a study of the current situation and the nature of the work to be done, in a field or field that may be known and familiar, and he can

To continue and continue its activity, or may need direct and close support, whether by normal and traditional means and methods, or modern and new.

and innovative. These are all proactive specifications that must be studied, as there are those who can unilaterally carry out the work, due to their experience, ability and capabilities.

It is not available to many, which may perform the same activity or different activities.

Confronting variables as well as constants is not easy or simple, as there are those who try to make those variables work

It may be acceptable, so there is nothing wrong with that, and it will go in its natural course for it, and there will be no negligible negative impact, but there may be some

These are the positives and advantages that few or many enjoy, as there is usually a benefit in gossip that is generalized to many, and this is what happens

Through the spread of what has been achieved, developed and improved, and the realization of the modern achievements that have been made, and what has become of benefit and goodness in them, so it will be

There is abundant production of it, and the ease and simplicity of benefiting from it, and the continuation of development and modernization if possible.

But despite that, there may be some of these competitions, as everything has diversity and difference, and if there is always preservation of the best

Which has the required specifications that may distinguish it, and what can be generalized to it, and spread in the long term and scope

The broad and the broad, or the specific in terms of the limitations in a specific scope for it, and the extent to which it is short or long, there may be some of those stages that

It may always need the necessary support for continuity and continuity, and support may always be necessary, in order to preserve what is

It is present from those early achievements that were made, which may meet a lot that affects them negatively and causes disadvantages, and therefore doing what preserves__

My feelings bleed with nostalgia

I live between the ruins of the years and memories like a beautiful perfume

There were days and years of building and steadfastness against the dangerous difficulty

Diseases, epidemics, wars and events in which the world is far and near

We lived among family, distant relatives, and good neighbours

And the strange thing about them is the enemy who does not show

One of them is the lover and the friend who never gets tired of them

No matter how long the meeting, conversation, and visits are, you benefit

Or the sworn enemy that you run away from

Even if from afar, he is spiteful, envious, harmful, may God save us from them

By supplication, almsgiving, and walking with the Most Merciful with piety

And righteousness and rational work

☆☆☆

We were marching groups and strong unrelenting relationships

Despite the distance and the passage of years

Or we walk alone, we struggle in life and learn more

And we get new where hard and far

Or leave the family and loved ones and the homeland for information

Good and useful work

Let's fix and build our homelands in which we live and live and in which destiny

It becomes well-off and happiness for us and for the generations after us

In security, peace and prosperity live

Today's harvest is ours to see...with a wonderful, beautiful bloom

After there was scarcity, there is abundance, and it does not decrease, but rather increases

After there was chaos or difficulty, effort, fatigue and exhaustion

Putting in a lot of effort...

There is the arrangement, the easy, the easy, and the close

And the security we want

We lived at the bottom and with the top, continuing

You see us on the sidelines

But we are in the depths

You see the contradiction in us

But we were faithful, honest, loyal and loyal

You see us looking rich rich..

But we were poor, satisfied, content, hidden

We were happy, happy...

But we have pains, sorrows and wounds

Buster Rahman does not show or reveal to others

Ramadan 1442

Heedlessness and the years pass

Why do the days pass slowly and ploddingly?

And when we wake up to her... we find that she has passed quickly, racing

She left us in hibernation... She didn't care and alerted us that the time had come

For your deeds, work, teach, and come to your achievements, so do not be lazy

So that you do not fail or lose and regret

How did the days pass when we were in the astronomy going around

And the achievements...

Where there is seriousness and effort, and in the battlefield of life, we strive and fight.. and we hope to win

And to reap what we sought for it... and God blesses us with it..

And makes it a support for us and a beacon in life that we continue and continue, and goodness grows and increases

memories ...

Days and nights and from a long time crystallized in the mind

As if it was yesterday... We remember it and everything is beautiful in it

But those who left and missed us… their memory is painful on the heart

We wish them with us, the separation of loved ones is difficult for everyone

We lived with them in serenity…

The mind does not bother with responsibilities after they left, as they were carrying them…

So we lived without a wing, as they were with us on the road, paving the way…

We go through life while they are with us, but they are veiled from us. We do not see them.

But with their prayers and blessings… and by the grace of God…

Doors open for us to be successful, victorious and victorious…

far from evil… and walking towards goodness…

So we became in their place and learned how heavy the burden was on them

Their kindness and compassion for us is unparalleled

And the mercy of God, with their prayers, covers us and lights up our lives.

And there we walk happily ever after

Pray for them that God will place them in the highest ranks.

In Jannatul Firdaus...

And we catch up with them ... Amen

Release Date

The name of the book or volume

/ 1997 AD - 1418 AH

Articles in management and economics (markets and projects), part one and two

01)

/ 1997 AD - 1418 AH

Oasis of inspiration and artist (poetry)

02)

/ 1997 AD - 1418 AH

Articles and information in management and economics (production and markets)

03)

/ 1997 AD - 1418 AH

Spring flowers are a wonderful thing (poetry)

04)

/ 1997 AD - 1418 AH

Articles and information in management and economics (facing changes in markets)

05)

/ 1997 AD - 1418 AH

Strange times we live in (poetry)

06)

/ 1997 AD - 1418 AH

Articles and information in management and economics (regional economic conditions)

07)

/ 1997 AD - 1418 AH

Opinions from Practical Life (Information Systems)

08)

/ 1997 AD - 1418 AH

Articles and information in management and economics (keeping pace with contemporary reality)

09)

/ 1997 AD - 1418 AH

Topics in management and economics (problems and fundamental solutions)

10)

/ 1997 AD - 1418 AH

Topics in management and economics (positive dealing with changing events)

11)

/ 1997 AD - 1418 AH

How did we become, after we became (poetry)?

12)

/ 1997 AD - 1418 AH

Information technology and management (nature of work and variables).

13)

/ 1997 AD - 1418 AH

Information technologies and industrial engineering (contemporary hot issues).

14)

/ 1998 AD - 1418 AH

Meeting After a Long Parting (Poetry)

15)

/ 1998 AD - 1418 AH

Information technologies and industrial engineering (developments, compatibility and suitability)
